PROJECTS

E-LEARN

Developed and enhanced the Student Module for Elearn, an innovative platform providing seamless access to courses, notes, PDFs, question banks, and videos, thereby promoting remote learning. This module empowers students to learn at their own pace and supports their academic journey, especially when physical classrooms are inaccessible.

AGRO-KERALA

Developed and enhanced the user-friendly and accessible User Module for Agro Kerala, an online platform providing farmers with seamless access to Krishibhavan services, market insights, and government schemes. This module significantly strengthened rural livelihoods by leveraging technology, especially during the pandemic.

AI-MENU

Developed and optimized the User Module for AI Menu, a platform streamlining the dining experience by enabling users to effortlessly browse menus, access food reviews, and place orders swiftly. This AI-powered system provides personalized recommendations and enhances order processing and delivery, boosting customer satisfaction and operational efficiency.
